

For My Library

STANDISH-WITH-LANGTREE.

URBAN DISTRICT COUNCIL.

ANNUAL REPORT

of the

MEDICAL OFFICER OF HEALTH AND NUISANCE INSPECTOR.

For the year 1920

Standish,

May, 1921.

To the Chairman and Members of the
Standish-with-Langtree Urban District Council.

Gentlemen,

In laying before you my sixth Annual Report I beg to thank you for the ready support given to me in all matters relative to the health of the Township during the past year.

I also beg to thank your Sanitary Inspector - Mr. Alvin Clough - for his willing assistance in all matters brought to his notice.

I am, Gentlemen,

Your obedient servant,

(signed) GEO. H. ORMSBY.

L.M.S.S.A. Lond.

Fellow of the Royal Institute of
Public Health.

Member of the Society of Medical
Officers of Health.

STATISTICAL SUMMARY FOR 1920

Population. Census 1911	6,527
Estimated Civil Population July 1st 1919	..		5,875
Estimated Total Population July 1st 1919	..		6,120
Estimated Total Population July 1st 1920	..		7,266
Area of District	5,264
Density of Population per acre	2.22
Births- Males 98, Females 62	155
Deaths- Males 49, Females 46	95
Annual Birth Rate	21.3
Annual Death Rate	13.0
Natural increase of Births over Deaths	...		60
Deaths from Zymotic Diseases	20
Zymotic Death Rate (excluding tuberculosis)			1.25
Phthisis Death Rate	0.82
Deaths in infants under one year	21
Infantile Death Rate per 1,000 births	...		175
Illegitimate Births	8
Illegitimate Deaths under one year	...		---

POPULATION AND RATES.

The Registrar General having decided that demobilization in 1920 had reached a stage at which it was felt that distinction between "birth-rate populations" and "death-rate populations" made during the period when a large part of the male population was under arms, might in general be discontinued, for most districts, therefore a single estimate of population is shown and this is applicable to both births and deaths. I have, accordingly, received the new figures of the estimated total population for 1920 which you will find have again been placed in the Statistical Summary. From the estimated Total Population the Birth Rate and Death Rate have been calculated.

NATURAL AND SOCIAL CONDITIONS OF THE TOWNSHIP.

Standish is in the Wigan Union, the sub-soil though mainly clay is of a sandy nature in the Bradley Lane and Chorley Road districts.

Coal Mining provides employment for the larger portion of the male population, while the females work at the pits as surface hands, a good proportion being employed at the cotton mills situated in Bradley and Coppull. The value of the open air life of the girls

at the pit head is exemplified in their finer physique and greater freedom from disease as compared with those employed at the cotton mill.

Farming is an occupation of considerable importance in Standish Urban Area. Much of the land is given over to crops, the grass land being mainly used for feeding dairy cattle.

BIRTHS.

These show an increase of 5 over the previous year. The excess of births over deaths is 60 as against 46 for 1919. Eight illegitimate births were registered - an increase of 7 over the previous year.

DEATHS.

There were 95 deaths compared with 104 for the previous year - a decrease of 9, the rate being 13.0 compared with 14.8 for 1919. Eleven of the deaths occurred outside the Township of persons belonging to the Township of which 9 took place in Institutions as follows-

Wigan Sanatorium	1
Wigan Union Workhouse	1
Wigan Union Infirmary, Billinge.	2
Wigan Infirmary	3
Rainhill Lunatic Asylum	1
Prestwich Lunatic Asylum	1
	<hr/>
	9
Other deaths	2
	<hr/>
	11
	<hr/>

Only one death of non-residents occurred in the Township which was transferred to the proper quarter.

INFANTILE DEATHS.

Twenty-one deaths in infants under one year were registered, a decrease of 2 over 1919, the rate being 135 per 1,000 births compared with 153 for the previous year. The causes of death were: pneumonia 5, premature birth 3, convulsions 3, tubercular meningitis 2, measles 2, diarrhoea, bronchitis, whooping cough, acute dermatitis, congenital debility and other causes 1 each.

Our high infantile death rate was again due to respiratory diseases and ante-natal causes, but with our Housing Scheme well advanced I hope to be able to report a much lower death rate next year as, in my opinion, many of the deaths are brought about by over-crowding and bad ventilation.

MATERNITY AND CHILD WELFARE.

This is undertaken by a Health Visitor appointed by the County Council and mothers and infants are systematically visited. I am of opinion, however, that with a Health Visitor of our own closer supervision would be possible on the part of the doctors and nurse.

THE DEATHS FROM ALL CAUSES WERE AS FOLLOWS:-

Measles	5
Whooping cough	2
Diphtheria	1
Influenza	2
Erysipelas	1
Pulmonary Tuberculosis	6
Tubercular meningitis	4
Other tubercular diseases	1
Cancer	7
Rheumatic Fever	1
Organic Heart Disease	5
Bronchitis	6
Pneumonia (all forms)	18
Other respiratory diseases	1
Diarrhoea (under two years)	1
Nephritis	2
Congenital debility &c.	4
Violence apart from suicide	4
Suicide	3
Other defined diseases	21
			<hr/>
			95
			<hr/>

ZYMOTIC DISEASES AND DEATHS.

Under this heading 60 cases were notified showing the large decrease of 86 over 1919 and were as follows: Diphtheria and Group 4, erysipelas 12, Scarlet fever 26, ophthalmia neonatorum 1, Malaria 1, Acute pneumonia and influenzal pneumonia 2, pulmonary tuberculosis 9, other forms of tuberculosis 5, The deaths from infectious diseases numbered 21 - pulmonary tuberculosis accounted for 6, other forms of tuberculosis 5, measles 5, influenzal pneumonia 1, whooping cough 2, diphtheria 1 and erysipelas 1.

The Zymotic Death rate is 1.23 compared with 0.85 for 1919. It is pleasing to note that no cases of enteric fever were reported during the year.

SMALLPOX.

No outbreak of this disease occurred during the year, The Isolation Hospital containing six beds is always kept ready for the reception of cases whenever an outbreak occurs.

During the year 73 primary vaccinations and 4 re-vaccinations were successfully performed. I am still of opinion that exemption from vaccination is too easily obtained and that measures for a speedy remedy should be adopted.

[illegible]

PULMONARY TUBERCULOSIS.

The Death Rate for this disease is 0.62 as against 0.42 for the previous year.

SCHOOL CLOSURE.

Owing to the outbreak of measles among infants attending school I found it necessary to adopt school closing. The schools closed and the period of closure are as follows: Standish Lower Ground - February 19th to March 21st; Standish National Infants - November 10th to December 24th; St. Marie's Roman Catholic - December 14th to December 24th. The schools were thoroughly disinfected before being re-opened.

WATER SUPPLY.

The supply of water is still constant and of good quality and is obtained from the Liverpool Corporation Reservoir at Rivington.

DRAINAGE, SEWAGE AND SEWAGE DISPOSAL.

Few defects were found, these being remedied when discovered. The effluent at the Chowley Road works was quite satisfactory. Some samples at Fairhurst House Sewage Farm were not up to the standard but showed improvement towards the year end.

SCAVENGING.

This has been carried out to my satisfaction.

CLOSET ACCOMMODATION.

I would like to see an ^{increase} ~~improvement~~ in the number of water closets and thus a corresponding reduction in the number of privies. While we have the existence of the latter amongst us closet accommodation can hardly be considered satisfactory.

DAIRIES AND COWSHEDS.

These were all found to be in a good state of repair and kept clean.

SLAUGHTER HOUSES.

These were examined and found satisfactory.

LODGING HOUSES.

There are no common lodging houses in the district.

HOUSING.

The Council is making steady progress with the Housing Scheme. A good number of the houses at the North side of Preston-road are nearing completion and I hope soon to see overcrowding a thing of the past. Many of the houses in the Township are still in a bad state of repair and I would like property owners to realize their responsibilities in this direction.

The following table shows the results of the examination of the candidates for the degree of Bachelor of Arts in the year 1880-1881.

RESULTS OF EXAMINATION

The examination was held on the 10th of June 1881. The candidates were divided into two classes, the first class consisting of those who had completed the course of study in the College, and the second class consisting of those who had completed the course of study in the University. The results of the examination are as follows:

First Class

The following candidates were admitted to the first class:

Second Class

The following candidates were admitted to the second class:

Third Class

The following candidates were admitted to the third class:

Fourth Class

The following candidates were admitted to the fourth class:

Fifth Class

The following candidates were admitted to the fifth class:

Sixth Class

The following candidates were admitted to the sixth class:

Seventh Class

The following candidates were admitted to the seventh class:

Eighth Class

The following candidates were admitted to the eighth class:

NUISANCES INSPECTOR'S ANNUAL REPORT 1920

Standish, April 1921.

To G. H. Oakes,
Medical Officer of Health to the,
Urban District Council of
Standish-with-Langtree.

Dear Sir,

I beg to lay before you my Report for the twelve months ended 31st December 1920:-

INFECTIOUS DISEASES.

The following cases were reported to me: Scarlet Fever 26, Diphtheria 4, Tuberculosis 14.

SCARLET FEVER.

The number is well below the average, nearly all the cases occurred during the first four months of the year. Only 3 cases were notified in the South Ward.

Particulars with regard to school attendance are as follows:-

Number attending elementary schools (details below)	...	14
" not commenced at School	...	7
" above school age	...	5
		<hr/> 26
Number attending Standish National School	...	8
" " " St. Marie's "	...	2
" " " Lower Ground "	...	2
" " " Grammar "	...	1
" " Schools outside Standish U. D.	...	1
		<hr/> 14

ENTERIC FEVER.

To be entirely free from Enteric Fever during the whole year is remarkable, and has not previously occurred during the past 25 years. The average number of cases per year has been about 11, and averaged from 2 to 29 per year.

SEWERAGE.

A serious blockage was found at Standish Lower Ground owing to a 9-inch sewer (at a depth of 9'6" in the roadway) breaking, and sinking about 15 inches. Five new 9-inch pipes had to be laid.

The only sewer extension has been on to the Council's Preston-Road Housing site.

SEWAGE DISPOSAL.

All the samples taken from the Chorley Road Works were found "Very good" but some samples taken from Fairhurst House Farm during

the summer and autumn were reported as "Fair" and "Poor"; there was, however, an improvement towards the end of the year as a result of various minor alterations and repairs. The seventeen acres at Fairhurst House Farm previously cultivated by the Council have been sublet for the same purpose.

SCAVENGING.

The North and Bears Head districts have again been scavenged by "day-work" the other three districts having been continued by contract. Commencing with the coal strike in the Autumn this work has been more difficult and costly on account of the larger quantity of ashes, etc. as a result of the burning of poor quality coal.

FACILITIES, WORKSHOPS, BAKEHOUSES.

Lime washing has been done and other nuisances abated as requested.

DAIRIES AND COWSHEDS.

It has not been necessary to make any serious complaints, and on the whole these places have again been kept clean and in good order.

SLAUGHTER HOUSES.

Following the discontinuance of Meat Control I have given more attention to the inspection of carcasses in the slaughter houses. Only organs have been found diseased and consequently destroyed. It has not been necessary to seize any meat as unfit.

NEW BUILDINGS.

Seven plans of additions and alterations to premises have been approved. Apart from the Council's Housing Scheme only one plan of a new dwelling house has been approved, and this is now in the course of erection.

NUISANCES.

Forty-seven were found and are now abated. Forty houses have been disinfected.

I am, Sir,

Yours obediently,

(signed) ALVIN CLOUGH.

Certified "Inspector of Nuisances"
"Inspector of Meat and Other Foods"
and "Municipal Engineer"

1. The first part of the report deals with the general situation of the country and the progress of the work during the year. It is divided into two main sections: the first section deals with the general situation of the country and the progress of the work during the year, and the second section deals with the results of the work during the year.

2. The second part of the report deals with the results of the work during the year. It is divided into two main sections: the first section deals with the results of the work during the year, and the second section deals with the results of the work during the year.

3. The third part of the report deals with the results of the work during the year. It is divided into two main sections: the first section deals with the results of the work during the year, and the second section deals with the results of the work during the year.

4. The fourth part of the report deals with the results of the work during the year. It is divided into two main sections: the first section deals with the results of the work during the year, and the second section deals with the results of the work during the year.

5. The fifth part of the report deals with the results of the work during the year. It is divided into two main sections: the first section deals with the results of the work during the year, and the second section deals with the results of the work during the year.

6. The sixth part of the report deals with the results of the work during the year. It is divided into two main sections: the first section deals with the results of the work during the year, and the second section deals with the results of the work during the year.

7. The seventh part of the report deals with the results of the work during the year. It is divided into two main sections: the first section deals with the results of the work during the year, and the second section deals with the results of the work during the year.

8. The eighth part of the report deals with the results of the work during the year. It is divided into two main sections: the first section deals with the results of the work during the year, and the second section deals with the results of the work during the year.

9. The ninth part of the report deals with the results of the work during the year. It is divided into two main sections: the first section deals with the results of the work during the year, and the second section deals with the results of the work during the year.

10. The tenth part of the report deals with the results of the work during the year. It is divided into two main sections: the first section deals with the results of the work during the year, and the second section deals with the results of the work during the year.

SUMMARY OF THE MEDICAL OFFICERS REPORT FOR 1920

Urban District of Standish-with-Langtree.

Medical Officer of Health - - - George Henry Omsby.
 Salary as M.O.H. 31/12/20 - - - £55.
 Is he a whole-time Officer - - - No.
 Inspector of Nuisances - - - Alvin Clough.
 Salary as Inspector 31/12/20 - - - £117-10-0.
 Is he a whole-time Officer? - - - No.
 If not, what other appointment
 does he hold? - - - Surveyor.

What is the character of the Hospital Accommodation? (For small-pox. Yes.
 (For other infectious diseases. No.

Is it Joint or otherwise? Otherwise.

If you have the joint use of Isolation Hospital belonging to some other Authority, state nature of "Agreement," or "Arrangement," Is any retaining fee paid?

No. of beds available for your district? (For small-pox. 6
 (For other infectious diseases. None.

(No. of houses disinfected? 40
 (Method? Fumigated and sprayed with formalin.
 (Are houses disinfected after
 disinfection. ((a) Phthisis? Yes.
 ((b) Measles? No.
 (Apparatus used for clothing,
 (bedding &c. (steam or otherwise)? None.
 (No. of articles disinfected? None except along with rooms.
 (Where is apparatus situated? None kept.

Are any Diseases notifiable other than those which are compulsorily notifiable (for instance, Measles, Whooping Cough, Diarrhoea, Chicken Pox, &c.)? No.
 If so, what are they?

What diseases have been specially prevalent? Measles and Scarlet Fever.
 Period? Measles- February, March, November and December. Scarlet
 Fever- Jan'y, Febr., March, April, October and December.

No. of times School Closure adopted for

Scarlet Fever - None	Whooping Cough - None
Diphtheria - None	Chicken-pox - None
Measles - 6	Influenza - None
Any other diseases (specify same)? None.	

No. of special Reports made under Art. XIX (15 and 16)

Sanitary Officers' Order 1910?

None.

Bacteriological Examinations.

No. of specimens examined - Blood 2, Throat Swabs 2, Sputum 20,
Swabs for Ophthalmia Neonatorum —, Milk —, Others —.

Diphtheria Anti-toxin Order 1910.

Is a supply of Anti-toxin kept within the district?

Yes.

If so, where? At the M.O.H.'s residence.

Amount used during 1920? 8,000 Units.

THE HOUSING ACTS, 1890 to 1919

Has your authority determined the procedure to be adopted for the inspection of your District as required by Article I. of the Regulations of 2nd Sept. 1910?

Yes.

Has your Authority prepared, as required by Article I. (3) a list of dwelling-houses, the "early inspection of which is, in the opinion of the M.O.H., desirable"?

Yes.

Has your authority designated an officer to undertake the special inspection of houses and to keep the records stipulated by Articles (II.) and (III.)?

Yes.

What Officer has been so designated? Medical Officer of Health and Nuisance Inspector.

Have the necessary books, forms, &c. for keeping the required records been obtained?

Yes.

Are these kept up to date?

Yes.

Action taken in 1920 under the Housing Acts:-

(a) No. of dwelling houses specially inspected during 1920 under Section 17 of the Act of 1909, &c. with a view to ascertaining whether any dwelling houses are unfit for human habitation?

None.

Have the particulars of these inspections as specified in Article II. (1) to (3) and Article III. (1) to (8) of the Housing (Inspection of District) Regulations, 1910, been fully recorded? -----

(b)* " Dwelling houses inspected under (a) which are considered unfit for human habitation?

None.

(c)* " Representations to Authority with a view to making Closing Orders?

None.

(d)* " Closing Orders made?

None

(e) " Dwelling-houses in which defects were remedied without making Closing Orders?

None

(f) " Dwelling-houses put into a fit state of habitation after making Closing Orders?

None

(g) " Dwelling houses demolished

None

General character of defects found to exist?

Total No. of dwelling-houses inspected for purposes of the
Housing Acts, other than those inspected under (a) above.
(NOT including inspections re Nuisances &c. See Note) None

NOTE.— The above particulars are required to be included
in the Medical Officers' Annual Reports on the
Housing (Inspection of District Regulations) 1910

Visits to houses for purposes other than the Housing
Acts should not be included here.

The particulars under (b), (c) and (d) should relate
only to houses inspected under (a).

If your Authority has a Housing Scheme, state what stage had
been reached on December 31st, 1920, giving information under
the following headings:

No. of schemes submitted	No. of Lay-outs		No. of houses in- cluded in house plans.		No. of houses	
	Submitted	Approved	Submitted	Approved	On which work has commenced	Completed
5	1	1	57	57	12	None

No. of houses built during 1920 by private enterprise? None.

Source of Water supply-

What is its condition?

Possibilities of Contamination?

Any insufficiency and where?

Nature of extensions (if any) during
the year?

Anglesark Reservoir of
Liverpool Corporation.

Very good.

None known.

No.

None.

Are scavenging and removal of House Refuse
carried out satisfactorily for whole of
district?

How performed (state whether by Sanitary
Authority, Contract, or Occupiers of
Houses)?

If privy middens exist, are they emptied
by day or night.

How is the refuse disposed of?

Has a destructor been provided?

Yes.

Contract partly, and
by Council's own men.

By day.

On agricultural land.

No. If so, specify

Sewage disposal Works, Method of Treatment?	By water carriage, by settlement, irrigation and filtration
What is the character of the Drainage system?	Good.
Any developments during the year?	No.
Area or Townships without proper drainage system?	Only scattered houses are without proper drainage system.
Action Taken — Drain testing, Flushing &c.	Systematically done.
Action taken with regard to the pollution of streams?	None.
Canal Boats: Number Inspected?	None.
What is the condition of the bakehouses?	Good. No. <u>Seven</u> .
What is the condition of the slaughter-houses?	Very clean. No. <u>Eight</u> No. Registered? — Licensed? <u>Eight</u> .
Has a Public Abattoir been provided?	No.
What is the condition of Lodging houses? Are they registered?	Good. No? — No.
Dairies, cowsheds and Milkshops— Are they periodically inspected?	Yes.
What is their condition?	Good.
Have any Regulations been made under the Order of the L. G. B.?	Yes.
Are they enforced?	Yes.
Amount of air space in cubic feet required for each cow —	
(a) Where cows are habitually grazed?	600
(b) Where cows are not habitually grazed?	—
Cowkeepers—	
Total No. of cowkeepers?	27
No. on register?	27
No. of inspections during year?	29
Dairymen or purveyors of Milk (other than cowkeepers)	Total No? <u>2</u> . No. on register? <u>2</u> .
Any arrangements for veterinary inspection of dairy cows? Give particulars.	No.
Action taken (if any) as to tuberculous milk?	None.
What is the Sanitary conditions of the Schools.	Good.
